DETAILED ACTION

Allowable Subject Matter

1. Claims 1-29 are allowed over the Prior Art of record.
2. The following is an examiner's statement of reasons for allowance: The primary reasons for the allowance of claim 1 is the inclusion of the specific limitations of a viscometer for testing the viscosity of a test specimen (i.e. fluid/gas) having a thermal block (as opposed to the Prior Art typically having a temperature bath/reservoir) a thermo/temperature control device to control/regulate the temperature of the block, a temperature sensor for measuring the temperature of the block, both a capillary tube, an entrance tube, and a velocity tube connected to one another, all embedded in the block wherein the entrance tube and velocity tube both proved a pathway from outside the thermal block to the capillary tube and at least two flow sensors aligned along the velocity tube (as opposed to a differential pressure transducer typically employed in the Prior Art) to measure the velocity of the test specimen through the velocity tube. As to claim 20, the detailed method steps are unique and novel, including the specific arrangement and steps of applying pressure as well as following a leading meniscus between at least two flow sensors. The closest Prior Art reference is US 3,024,642 to Jones, Jr. (see Fig. 1 below), which discloses a viscometer, however, employing a temperature bath instead of thermal block, a differential pressure sensor (26) as opposed to at least two flow sensors and a temperature sensor (21) attached to a thermal control unit, however, the temperature sensor measures the temperature of the fluid after passing through the velocity tube, not the temperature of the bath.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Applicant is invited to review PTO form 892 accompanying this Office Action listing Prior Art relevant to the instant invention cited by the Examiner.

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to John Fitzgerald whose telephone number is (571) 272-2843. The examiner can normally be reached on Monday-Friday from 7:00 AM to 3:30 PM. If attempts to
